Chennai, India | P: +91 6382639770 | [bharath.anbuselvan7@gmail.com](mailto:bharath.anbuselvan7@gmail.com) | [GitHub](#)

## Skills

---

**Programming Languages:** JavaScript, TypeScript, Python

**Libraries and Frameworks:** React JS, Node.js, Tailwind

**Tools and DataBase:** MongoDB, GitHub, Git

## PROJECTS

---

### Mock Shopping Site

May 2024

- built with React JS, tailwind and fetches the mock products from an external API
- Allows the users to perform actions such as searching for products, adding products to the cart, changing the quantity, removing from the cart.

### Password Generator

July 2024

- Made with React JS
- Allows the users to generate a password based on the selected inclusion options and a specified length.

### A Memory Game

Jan 2024

- Built with React JS, JavaScript, CSS with data sourced from a free Pokémon API.
- In this game, players select a unique card from a shuffled bunch each time, earning a point for each unique card chosen, and if they choose the same card again, the game resets.
